

PowerFold FRONT HITCH

*System compatible with
all tractor brands*

www.laforge.fr

The unique **LAFORGE** expertise in designing and manufacturing front hitches is demonstrated again with the introduction of the exclusive and patented **PowerFold** system which allows it to fold in transport position, without any manual handling of parts and with 100% automatic return to work position.

Fold/ind switch to operate simultaneously with the raise switch to go to folded position.

Return to work position is obtained simply by operating the lower switch from the front or from the cab.

Technical data:

- Catégorie:** 3N
- Lift capacity at ball ends :** 6400KG
- Lift range:** 800 mm

The **PowerFold** front hitch retains the side to side contour following capability, while carrying implement's weight (**LAFORGE** exclusive). The lock plate allows utilisation of offset implement such as a front plough.

The **PowerFold** front hitch is fully compatible with the exclusive and patented **LAFORGE** electronic control and dynamic contour following system (**DynaContour**®).
